#### Question:

#### The Apple Brand Personality

Apple has a branding strategy that focuses on the emotions. The starting point is how an Apple product experience makes you feel. The Apple brand personality is about lifestyle; imagination; liberty regained; innovation; passion; hopes, dreams and aspirations; and power-to-the-people through technology. The Apple brand personality is also about simplicity and the removal of complexity from people's lives; people-driven product design; and about being a really humanistic company with a heartfelt connection with its customers. Through these qualities, Apple is positioned as being extremely helpful to people (and businesses) as they strive to achieve their goals.

It is arguable that without the price-premium which the Apple brand sustains in many product areas, the company would have exited the personal computer business decades ago. In recent years, this strength in brand preference has flowed directly to Apple's profits - as the company dramatically improved its manufacturing costs, while still maintaining very strong brand equity.

1) Write an essay based on the following, in order to maintain Apple's brand strategy:

a) Image (10marks)b) Identity (10 marks)c) Reputation (10 marks)
